Summoners War Best Monsters There are so many monsters, as we discussed before, to unlock through this Summoners War tier list, and every one of them will come with their unique move sets, styles, and usefulness to the team. Taking all these monsters for the turn-based battles will make you a good chunk, and for better performance, you might need the best ones in the game. So we have collected several monsters that you can pick here from their great strengths and their suitable characteristics for each phase of the game. This list is included with the best monsters who are ideal for both PVP and PVE contents, and many of them are fit amazingly for the area where you will play. Most of these top monsters are from a grade of 4 to 5 stars and will be the rarest ones on the game. So let's see who will be the best for the gameplay of Summoners War. Akhammir This monster is a great monster that players can use for the offence on any stage. He has a mega-smash that can dish significant damage to opponents, and it will be continued for more than two turns in the game. The ability to super crush this monster hold wit stun and hit for every enemy it meets, and the Mash crush skill can devastate every opponent for sure. With such incredible firepower, Akhammir is a monster that plays a great role in the game, and any player wouldn't fail by using this hero for their offensive needs. But remember that this monster is showing poor qualities for the defence strategies, and it does no harm for the greatness it holds. Akhammir can be significantly combined with the most popular allies, and through that, those allies will be able to continue their fighting and be alive. Dark Homunculus This monster is an all-rounder for the game, and she only has a weak point associated with the guild war defence. And that is it for her weakness and nothing at all. She is always a solid choice for many players as an offensive option, and Dark Homunculus comes with tremendous solid base stats to improve and level up. So we can say that any player wouldn't go wrong by choosing this monster, and for any gaming situation, this monster would be high from your capacity. If you want to dig dungeons better with these monsters, check out our Summoners War Dungeons guide from here. Elsharion Elsharion, as a monster, is the most balanced character among all the tier characters, and he can excel his greatness towards the supportive and offensive skills. A mega-smash skill is associated with this monster that can perform massive damage within two turns. The master of magic power he holds allows this monster to steal advantageous effects and even apply those to all the team members. Jeanne Jeanne is a monster who got a heft leadership skill, and it can boost the resistance of all the enemies within a guild battle. This boost will be whooped up with a 55% amount, and Jeanne is a monster who has a very good speed with her. This monster's biggest drawback is that you can use her efficiently within the dungeons since many other monsters can perform significantly on running. Sigmarus Sigma is a monster who can be identified as a key character to the game, and if a player is especially playing through the dungeons, this is the monster they can use efficiently. There are leader skills associated with this monster up to 44% boost for all his allies. And it applies while he is in a dungeon. There are amazing and most effective attack abilities wrapped up with this monster, and those attacks are beneficial to his Ice Volcano ability. This attack helps explode volcanoes to inflict severe damage to all the opponents. And it will be based on the maximum HP held by the monster while decreasing their attack power within two turns. Tesarion Tesarion is not so great a monster that you can use for the Dungeons, but he is a solid pick on every other game phase. Tesarion excels greatly within PVP and especially within the Guild Wars as well. This monster's ability to inflict Oblivion effects on the enemy monsters can reduce their whole use to the game. And also, it will make them so much easier to kill. Tesarion is a great monster that you can use on raids, and due to his solid base stats, and the massive damage capabilities he holds, he will be a great monster to use on your gameplay. Theomars Theomars is an amazing monster who you can put in the PVP of its abilities on utilizing the runes. Through that, he can increase the damage output chained between the enemies. Theomars come with a solid defence stat that will last for over the solid amount of turns, and this monster is a great offensive option for Summoners War. What is making this Theomars more shining is its leadership skills as it can increase the critical rate on every ally by 24%. Vermos Vermos is the monster you can use for an incredible speed as it comes with an awakened 100. She is an excellent monster that players can use within the dungeon and provide a massive boost for beginners. When you use Vermos's AOE stun attacks, the super crush will deal damage equal to this monster's maximum HP. Vermos can lose some of the utilities around his mid-game, and it is not an excuse to get rid of this monster since it has powers. Water Homunculus Water Homunculus is a monster with a passive ability called magic power explosion, and it can revive 50% of this monster when he is being hit with fatal damage. What makes him great is the magic power explosion, and it gives a 30% boost for all the damage done to the enemies. Players will not control it, but it is a worthy chance to try since it is a great help for your pinch. Xiong Fei Xiong Fei may be seen as a panda, but he is not as it seemed on a panda. He is a balanced monster with better supportability in removing harmful effects. Xiong Fei can bump up all the ally defences, and he becomes really good at tackling those NB10 dungeons. Here, his abilities are hitting all the enemies with a three solid strike, and Xiong Fei is a great monster that you can effectively use on raids. Once this monster is awakened, he will take incredible speed and take solid damage. And also, Xiong Fei will be easy to kit out with the runes. Now use the Multi-Instance Sync feature from LDPlayer to earn these monsters speedily. As this feature creates multiple instances from the same game, you can use it as a benefit to earn your favourite hero by multiple rerolling at once. And more than that, it assures you that you will be the best hero you ever wanted. Conclusion So that is the end of the Summoners War tier list, and make sure to always go with the tier S, A, and B for your gaming monsters as they are very useful for the gameplay. Don't give at least a look from the D tier if you have any other options, as they are too bad. Use the best and conquer the victory from its best. In the Summoners Era, there are currently132 charactersdivided equally across 6 factions. Heroes are subject to an initial rarity grade from 1 to 5 stars, but each can be upgraded to 6 stars. Heroes also have roles, which is essential to consider when forming teams. Image via Fansipan Limited There are five summoners available, but just one of them can be selected to lead your army.
