Looking to try before you buy? Get access to our most comprehensive plan for 14 days. Try It Free Everything you need to get started with Bluebeam Revu for desktop and Bluebeam Cloud for Mac, iPad and Android. You'll need to buy a subscription plan or start a trial to access Revu 21 and Bluebeam Cloud. Bluebeams subscription plans give you access to our latest version Revu 21, as well as Bluebeam Cloud, our new suite of solutions for web and mobile. Heres whats new in Revu 21. You can purchase a Bluebeam subscription plan in our web store to access Revu 21 and Bluebeam Cloud. To verify which version you have on your Windows computer, click Start > Settings > Apps and search Revu. You'll need your Bluebeam ID to access Revu 21 and Bluebeam Cloud. If you purchased a subscription, you'll just need your BBID to access Revu 21 and Bluebeam Cloud. For Revu 20 or an earlier version, you'll need a serial number and product key to register Revu. For help with finding your product key, check out this article. This could mean that you havent purchased a Bluebeam subscription, or youve logged in with a BBID not associated with your current subscription. You can view our plans here. If youre a Bluebeam subscriber, alerts will appear in Revu 21 when new updates are available and you can choose to update at that time. For Bluebeam Cloud, you'll receive ongoing updates automatically on the web and the iOS app may need to be updated periodically on your device. If youre using Revu 20, alerts will appear when new updates are available and you can choose to update at that time. You may be using a serial number and product key for an older version. Contact us. You can easily access your drawings and documents from Revu on any web or iOS device by logging into Bluebeam Cloud. Try Bluebeam free for 14 days. Bluebeam is available to download and trial for 14 days. You'll get access to our current version, Revu 21, and our most comprehensive plan, Complete, plus Bluebeam Cloud to collaborate on project documents and track punch, RFI and submittal workflows on the go. Bluebeam develops construction software solutions that help architects, engineers, and builders to communicate better between the office and the field. Any workflows that would have traditionally been completed on paper like quantity take-offs and design reviews, can now all be done digitally in Bluebeam. What is Bluebeam Studio? Bluebeam Studio is a collaborative workspace thats built into Revu, so, you can have all your project information there like your drawings. You can even have other Excel files, and other formatted software saved into there. Or you can also go to Studio Sessions, which is a PDF collaboration space, where you can invite other people to do live markups with one another and then effectively report on this. So, it is a live collaborative space. Bluebeam Cloud is a cloud-based web and mobile platform that enables users to use the documents they have in Revu on the go. While youre onsite, you can post RFIs, manage documents, and complete defect inspections. Definitely. First, youre going to make sure your drawing sheets are calibrated so you have the right scale involved. From there, weve got a whole range of tools you can use. We have area, polylength, you can do volume, you can do counts and so forth. But everything on the PDF is a 2-in-1 source of information, its in the markup list, and that will add up on the fly. As an extra little bonus, you can create a legend on the drawing sheet of specific markups or measurements, and ill add them up on the fly as you do it live, so thats a nice little workflow too. Bluebeam Cloud is a web-based solution so its usable on any web browser, on PC or Mac. For iPad users, we also have Revu for iPad. And they all collaborate with Studio Sessions. What Bluebeam has is an add-in for AutoCAD. And essentially what were doing is converting to a PDF. So, convert the DWG file to the PDF, which then can be used for markup and collaboration. Bluebeam was founded in 2002, and in 2014 we joined the Nemetschek Group of brands, which develops software solutions for the entire AECO lifecycle. Bonus Fact! Did you know that Bluebeams first solution, Pushbutton PDF was originally designed by engineers from NASA, who were really frustrated with the PDF solution they were using at the time? Yes. OCR is optical character recognition and thats where the software will convert text that isnt a vector or real text inside the PDF, its an image of text or numbers, into actual text and numbers that can be searched. Which is a really powerful workflow for anyone doing quantity take-offs or searching for particular information inside a PDF. Bluebeams head office is in Pasadena, California. And weve got teams all over the United States, Canada, the UK, Sweden, Denmark, Germany and here in Australia. There is a 30-day free trial and its important to note that collaboration is part of the DNA of Bluebeam. Anyone with a licence can invite a guest collaborator to join in on the Studio Sessions. There are three Bluebeam subscription plans, and you can mix and match them based on different roles in your business. Theyre all billed per user, and theyre billed annually. And with that subscription you also get access to Bluebeam University, tech support and unlimited secure storage. Yes, it is free for students. It is also free for educators as well. They can obtain a licence and they also get access to Bluebeam University for their further education. And they can also get heavy discounts on becoming a Bluebeam Certified Professional. Bluebeam is the industry standard for PDF markups, digital workflows, and effective project collaboration. Mark up 2D or 3D PDFs with flexible tools for every trade Build custom workflows to speed up end-to-end tasks Invite teammates to mark up or measure in real time Bluebeam construction software is used for PDF markups, digital workflows and AECO project collaboration. It gives teams intuitive, highly customizable tools for simplifying complex end-to-end tasks. It also allows teams to mark up and measure together in real time. Bluebeam offers three subscription plans you can mix and match for users with different needs. Check out our pricing page to learn more. Your Bluebeam free trial will give you access to our Complete subscription plan for 14 days. You'll need to buy a subscription to continue using Bluebeam after your trial. Your trial will give you full access to our most comprehensive subscription plan, Complete, which includes the latest version of Bluebeam Revu, Studio in Revu and Bluebeam Cloud for web and mobile. Complete also includes access to Bluebeam University courses so you can learn key features and workflows live or on demand. Check out our pricing page to learn more. Yes! We recommend all students and educators apply to join our Academic Program. Those who qualify get full extended access to Bluebeam Revu 20 for free during the academic year. It looks like youve already tried Bluebeam with this account. View Our Plans It looks like youve already been assigned a Bluebeam license, or youve signed up for a trial using this email in a different server region. Centralize documents in one place so office and field are always in sync. Keep PDF sets organized with the time-saving automation and hyperlinking tools. Or use AI to overlay and compare documents faster. Add customizable markups such as text, highlights, clouds, callouts, stamps and more Create multiple offset copies of markups and measurements for quickly scaling up counts, creating forms, grids, and more Collaborate from anywhere to accelerate design reviews and reduce miscommunication. Mark up and measure together simultaneously across devices. And track every change from the start to ensure transparency. Securely access, view and edit the latest project updates on desktop, web or mobile Automatically track all edits to see who said what, and export project data into your preferred reporting tool Take quick, accurate measurements and discover your projects true scope faster. And export all material quantities to your preferred bidding software to win more jobs. Track running totals as you draw with dynamic measurement tools, then display measurements directly on the drawing itself Standardize communication across teams and projects with custom tool sets, and export takeoff data to Excel for easy estimations Take control of worksite safety with smart, reliable tools for digitally collaborating on logistics plans. Mark up the latest set with teammates, and document every single change. Build more precision into your schedules and agendas with centralized document management Share the up-to-date documents with every relevant collaborator, stakeholder and subcontractor With the release of Revu21, features and functionalities for PDF management and collaboration are now available upon purchasing one of our new subscription plans: Basics, Core, or Complete. However, there may be instances when you access Revu without a subscription or work with others who dont have a subscription. In this article, well go over the features available in Revu and Studio to those without a subscription. To see a comprehensive list of Revu21 features available for each subscription plan, visit this article. When accessing Revu21 outside of a Studio Session, markup tools are grayed out if you dont have a Bluebeam Plan. However, you can still open, view, and print PDFs, as well as fill out forms, in Read-only mode. Please see the table below for additional Revu features that are available outside of a Session without a subscription: Feature Description Feature Location Access and view recent PDFs File Access > Recent Files Open and view existing 3D PDFs File > Open (Ctrl+O) Open existing files in a Studio Project or Session Studio Check Out / Check In existing Project files Studio Projects Apply standard hatch patterns Properties panel Tools > Toolbars > Properties Toolbar Tools > Toolbars > Appearance > Change Subjects and Comments in the Tool Chest Tool Chest > > Detail Export tool sets from the Tool Chest Tool Chest > > Export Track and manage markups via the Markups List Markups List View, manage, and sort markups and comments Markups List > Filter List Create and save custom Markups List filters Markups List > Filter List > Select column header > Custom Launch multiple instances of Revu Start or desktop > Revu Drag document tabs into new windows across multiple monitors Document tab > Right-click > Detach Even without a Revu21 subscription, you can still participate in Studio Sessions. However, you'll have limited access to classic markup tools and customizations. In Sessions, non-subscribers can copy other users markups and access the following tools: Feature Description Feature Location Text Box Tools > Markup > Text Box Callout Tools > Markup > Callout Pen Tools > Markup > Pen Highlight Tools > Markup > Highlight Line Tools > Markup > Line Arrow Tools > Markup > Arrow Dimension Tools > Markup > Dimension Cloud Tools > Markup > Cloud Cloud+ Tools > Markup > Cloud+ Stamp Tools > Stamp Non-subscribers can use all colors for their markups. Appearance properties such as fonts, font size, line styles, opacity, and shape modification are disabled. Do you have additional questions about accessing Revu without a subscription or general questions about our new subscription plans? Feel free to contact us. How-To Revu 21 Subscriptions Markup This article covers the available functionalities for working in Revu and Studio without a subscription. Bluebeam Revu is a software application that allows users to markup, organize, takeoff, and collaborate with PDF files.
