Here are some "Homage UPS specifications and solutions". Basic Homage Problem, Faults and their Solution.As we all know Homage got very famous in few months of its publicity. Especially it got famous in urban areas. It is totally a digital machine. As compare to traditional UPS there is no any transformer or heavy machinery in this instrument. It is light weight as well as consume less electricity. The most important part is it automatically trip when battery got charge fully or in case of less voltage. The Price of Homage UPS is from 11,800 to 20,000. you may like to read Check PTCL Telephone Bill Online - Download Duplicate Bill. Here is some most common Homage UPS specifications and solutions: Homage UPS specifications and solutions. Price [howpk.com] Some faults and solutions: Homage UPS specifications and solutions, Price, faults [howpk.com] Some other problem with their solutions: 1: UPS is running continuously in inverter mode despite of main electricity presence. Make sure that input plug is connected and providing electricity to the UPS. Sometimes, fuses of input melt resulting in no input. You need to change the fuses. It also happens that if input voltage is too low to be acceptable, UPS does not switch over to main electricity supply. 2: It goes to backup mode repeatedly for example every 15-20 min while AC power is still there. Usually, it happens when input voltage falls below the threshold of UPS. For example, if threshold of input is set to 185 V and input falls below than that, UPS will automatically switch over to backup mode no matter AC power is still available. Check the voltage to confirm if this is the case. 3: Batteries are charged but UPS is not providing any backup. In fact, UPS is not switching to backup mode. Usually it happens if battery terminals are corroded. UPS can not draw enough current through them to provide the backup. You need to clean or change the battery terminals. Also check to make sure that output of UPS is properly connected. If everything looks fine from the outside, then problem could be inside of power inverter. These are the most common problem in Homage UPS and inverter in all versions. If you have any other Problem please share us via comment. We will help you to resolve your Problem.
