For example, with the iOS 15 SDK, your app can take advantage of Dark Mode, Sign In with Apple, Core Data syncing with CloudKit, PenciliKit, and more. Stephen is one of the best instructors of Udemy and his teaching style is really greatKotlin is a general-purpose programming language from JetBrains, the company behind tools like IntelliJIDEA, Reshaper, and PyCharm. If you have already decided to learn Flutter and looking for a resource, then I suggest you check out this Flutter & Dart — The Complete Guide [2022 Edition] by Maximilian of Acadmind on Udemy, one of my favorite courses to learn Flutter in 2022.Apart from Flutter, if there is another framework you can check out for developing native cross-platform mobile apps, then they React Native. For example, if you are interested in developing native iOS applications for iPhone and iPad (they make most of the money on mobile apps) then learning Swift 5 and iOS 15 is a good idea, but if you are interested in the Android platform (they have the highest reach) then learning Kotlin and Android is a good option. Though, one of the most important things to note here is that you don't need to learn all the things I have mentioned here; in fact, all of them are presented here for informational purposes so that you can choose which technologies and platforms are suitable for you. If you want to learn Dart in 2022 and looking for a recommendation, I suggest you go through this Flutter and Dart Masterclass course on Udemy.If you want to build a native mobile application with .NET and C#, then there is no better choice than Xamarin. You don't need to learn them all, choose the one which suits your needs.For example, if you want to build native mobile apps for iOS platforms then learn iOS 14 and Swift 5, and if you to develop for the Android platform then learn Kotlin and Android 10, and if you want to build cross-platform native mobile applications then learn Flutter and Dart in 2022. If you need a resource, check out this Kotlin Fundamentals course from Pluralsight.Swift is another programming language from Apple which you can use to develop mobile applications for iOS (iPhone and iPad), macOS (MacBook Prob), watchOS (Apple Watch), tvOS (Apple TV), and beyond. Btw, this is in continuation of my articles about essential things for developers earlier I have shared about 10 Things Web Developers Can Learn in 2022 and essential skills for Java developer, if you haven't read them already, you can read them now.Without wasting any more of your time, here is my list of some of the best frameworks, programming languages, and libraries you can learn to get into mobile application development.1. FlutterThis is an excellent framework for developing cross-platform native mobile applications in 2022. If you want to learn Ionic in 2022, then I suggest you check out this Ionic 4 MasterClass course on Udemy. If you are one of them, then I suggest you learn React Native in 2022. It's a beautiful, JVM based programming language and compatible with Java, another popular language for developing Android applications. In particular, I have included cross-platform mobile development frameworks like Flutter and React Native, programming languages like Kotlin, Swift, and Dart, and platforms like Android and iOS, which are essential for any mobile app developer in 2022. It also comes with some exciting features developers have long been asking. If you don't know, Dart is a programming language from Google aimed at developer productivity. If you need a resource, I recommend you to check out this iOS 14 and Swift 5 — The Complete iOS App Development Bootcamp course from Angela Yu, another great and practical instructor on Udemy.If somehow you didn't like React Native and Flutter and looking for alternatives, then you can also check out Script. Unlike Golang, another programming language from Google, Dart is in between Java and JavaScript, and you can learn it quickly if you are familiar with any of this language. Swift allows you to write safe code without compromising speed and performance. It uses React and JavaScript for producing high quality native mobile apps. It was released on October last year, and unlike the previous Android version, it doesn't have any sweet names like KitKat, Oreo, or Lollipop. Ionic Framework is a free and open-source and provides a portable UI toolkit for developing high-quality cross-platforms apps for native iOS, Android, and the web- all from the single codebase. If you are an Android developer or want to learn Android in 2022, I suggest you learn Android 12, the latest version of Android OS, and if you need features, I recommend The Complete Android 10 & Kotlin Development Masterclass course on Udemy.This is the latest release of the popular iOS platform, which powers the iPhone and iPad, two of the most powerful devices of humankind. If you don't know, Kotlin is the official programming language for developing Android applications as announced by Google a couple of years ago. Ionic also allows you to build cross-platform mobile apps, which means you can create an application for any platform using one codebase. It also has an Ionic React that leverages React for building hybrid mobile apps. If you are a frontend developer and already know frameworks like Angular or Vuejs, then Native Script can be the right choice for you. If you are serious about developing mobile applications for Apple products like iPhone, iPad, and MacBook Pro, then you should learn Swift 5.1 in 2022. It's a simple, elegant, and powerful programming language, full of modern features the developer loves. Also, there are a lot of resources to learn React Native, both free and paid, but if you ask my recommendation, I highly recommend you check out Stephen Grider's The Complete React Native + Hooks course, one of my favorite resources to learn React Native online. Swift 5.1 also makes it easier to create and share a binary framework with others. If you want to learn Xamarin in 2022 and looking for resources, I suggest you check out this Xamarin Forms: Build Native Cross-Platform Apps using C# course by Mosh Hamedani on Udemy.That's all about some new frameworks, libraries, programming languages, and platforms you can learn in 2022 for Mobile application development. If you are interested in the Android platform or already an Android developer, you can learn Android 10 to learn new features like Dark Themes, Smart Reply, Gesture navigation, 5G Networks, Enhanced location, and privacy tools, etc. By using Xamarin, you can build native Android, iOS, tvOS, watchOS, macOS, and Windows apps using .NET with native API access. If you are an iOS developer or want to become an iOS developer in 2022, I suggest you learn iOS 15, and if you need resources, check out this iOS MasterClass from Angela Yu on Udemy.This is another framework for developing hybrid mobile applications using JavaScript. If you have any questions or feedback, then please drop a note.P.S. — If you get confused with so many technologies, programming languages, and frameworks then I suggest you start with Flutter, and if you need a free online course, you can also check out Introduction to Flutter — a free course by Google Developers on Udemy. NativeScript is a free and open-source framework to develop a mobile application for both Apple iOS and Google's Android platform. Like Golang, TensorFlow, and Angular, Flutter is also from Google, which uses Dart (another programming language from Google) and provides SDK for developing a cross-platform native mobile application. Flutter solves that problem by allowing you to create mobile apps for both iOS and Android devices using the same codebase. Whatever you choose, I have also provided links to some excellent resources which can help you to learn these technologies. And, if you are interested, like me, in developing cross-platform native mobile apps (both Android and iOS app from a single codebase), then you should learn Flutter or React Native, two of the leading frameworks for building a native mobile application. All you need is a free Udemy account to join this course. NativeScript features deep integration with both Angular and Vuejs and allows you to write code on any language, which translates into JavaScript like TypeScript or CoffeeScript.If you need resources, I suggest you check out this Native Script + Angular: Build Native iOS and Android Apps course by Maximilian Schwarzmuller on Udemy.This is the latest version of the Android platform. It's the right choice for all web developers who wants to become a mobile app developer and already familiar with technologies like JavaScript and React. In this article, I am going to share 10 technologies you can learn to become a mobile application developer or someone who wants to improve as a mobile application developer for Android and iOS platforms can learn in 2022.This list includes things like framework, programming languages, and platforms, almost everything a mobile developer needs. If you want to build native mobile apps in both TypeScript and JavaScript and using Angular and Vuejs. It's always been challenging to release your app to different platforms like Android, iOS, and Windows Mobile, as you need to maintain separate codebase. If you like this article useful and find these technologies worth learning for mobile app development, then please share it with your friends and colleagues. Hello guys, Mobile application development is an exciting field for programmers as it has all kinds of opportunities, from freelancing to working at large companies and launching your own apps like Angry Bird, Flappy Bird, or Pokemon Go and becoming an App millionaire.If one of your goals in 2022 to learn Mobile application development and you wondering how to start, then you have come to the right place. If you are serious about developing mobile apps for the Android platform, the world's most popular mobile platform, then you should learn Kotlin. Flutter has seen a lot of growth in the last 2 years, and its now the #1 framework for developing native mobile apps. I just updated my iPhone on iOS 15, and I am really impressed with sleek writing without lifting my finger. Xamarin is a tried and tested platform and great for C# and .NET developer who wants to get into mobile application development. You can also optimize your apps for foldable and other large-screen devices. It's created by none other than Maximilian Schwarzmuller, one of the best instructors on Udemy and YouTube.If you want to learn Flutter, which you should, if you are serious about building cross-platform native mobile applications, then learning Dart could be beneficial for you because Dart is the programming language that powers Flutter.
