

I'm not a robot

So I just finished fighting Yan and Xiao and made my way to the last tier and Ive kind of been running into this issue where Im just seriously not seeing the smoke OP wave that everyone else seems to be in. To be fair I havent struggled too much in the game at all up to this point besides some of the gimmick abnos and being confused but I took my singleton Yae page into both the aforementioned fights and a lot of the SOTC ones and idk it just felt like really fucking bad. Im running all the right stuff passive wise I think Yaes page with sooty thwack from wang and lion fist and high level acrobatics from Emma. Im running a singleton build on it at the moment to take advantage of the economy of multi slash by running - smoking pipe, gigigig, multislash, smoke blow, smoke prick, will of the precepts, deep drag, vapor, and exhale smoke- but it just feels like I lose every single clash outside of ones with vapor against another single hit card. I realize Im going for the stagger damage more than anything with sooty thwack so should I just avoid clashing and only be going for one sided attacks? But then I fail to build much emotion level and he gets targeted a lot. Moreover it feels like the light generation is horrendous on it even with smoking pipe and multislash in the deck it feels like once I use any of the high cost cards Im struggling for light. I was super looking forward to using them in xiao because I know slaggering her was basically the win condition but they just failed ducking every clash I tried to do miserably even accounting for pu Lao, and strength, and they were getting Nikolai buffs too. (Though my Kalo was also suffering so could have just been a. Xiao thing but he was equally bad in the Yan fight) Idk it could just be bad rolls but its always felt like it I struggled to use any iterations of it well either from light problems or just not really landing damage unless I go super out of my way to give them all one sided attacks. Go to SPFootballLife r/SPFootballLife Go to VALORANT Im just a noob Iron player, and people play smokes so rarely that I just decided to main controllers. I have fun with most of them and I feel like they fit my playstyle, but sometimes I dont know whether my smokes help or harm my team. My general idea is that on attack, smokes reduce the number of angles that enemies can shoot from, and on defense, increase the number of angles that you can shoot from, but Im not so sure.
