Earn some cash to unlock new characters, or train your current character to become the best Flip Runner! How to play: In Flip Runner you are a parkour runner. You are standing on the edge of buildings. First you'll have to aim where you want to jump. When the arrow is in the desired position, click. Whilst in mid-air, press and hold your left mouse-button to spin until your feet are pointing towards the floor and then release the mouse-button again. About the creator: Flip Runner was created by Motionvolt Games. They have also created the immensely popular Flip Master and Flip Diver back in the days. Lately they have also released Backflipper. Crazy Flips 3D is a dynamic and entertaining physics-based game where players perform flips and stunts in mid-air using a 3D character. The main objective is to execute successful flips from various heights, land perfectly, and earn points based on the complexity of the stunts. The game challenges players' timing, precision, and creativity as they perform increasingly difficult stunts from platforms, trampolines, and other surfaces. History of the Game Crazy Flips 3D belongs to the genre of physics-based stunt games, which have become popular due to their simple mechanics and addictive gameplay. The game was likely inspired by other flipping and parkour-style games that gained traction on mobile platforms. It's designed for quick, casual play but offers enough variety in stunts and levels to keep players engaged for extended periods. How to Play Crazy Flips 3D Gameplay In Crazy Flips 3D, players control a character who jumps from different heights and platforms, performing flips and rotations mid-air. The goal is to land on both feet as smoothly as possible. The complexity of flips, the height of the jumps, and the accuracy of the landing all determine the player's score. Players earn more points for executing complex flips, such as backflips, front flips, and combinations of spins, while maintaining balance for the landing. Instructions for Using the Mouse and Keyboard When Playing Mouse or spacebar: Jump and control the timing of the flip. The longer you hold, the more flips the character will perform. Left-click or release spacebar: Stop the flip and prepare for landing. Arrow keys or mouse movement: Adjust the position and orientation of the character mid-air to control the rotation speed and angle. R key: Reset the level if you want to retry a jump.
