How does it work? After installing Stremio on your device and creating an account, simply visit the add-ons directory and install any add-on and you're done! You can then go to Discover or Board to start browsing content. What can I do with Stremio? Which add-ons are available? Can I stream anything? Can I sync my library? Can I share my library? Can I use my personal information beyond the minimum required to create and sync an account. There is also a quest mode when logging in that does not require any data in this mode no connections are made to our backend. But there comes at the expense of useful features. B. the ability to synchronize the library on different devices. Can I stream to TV? Yes, support Chromecast and you can cast from both desktop and mobile (Android) apps. How many add-ons are there in Stremio? More than 50 since late 2019 - see our add-ons catalog for more details. Can Stremio be extended beyond what is included in the add-on directory? Yes, you should check these out: PimpMyStremio, Reddit Communities, Stremio Downloader, etc. What devices does Stremio support?for Windows, Mac and Linux. For mobile devices, we support Android and iOS, but please note that iOS offers limited functionality (most add-ons are not supported). There are many Android devices you can run Stremio on, such as: B. NVIDIA Shield and Amazon Fire Stick, but we don't officially support them. Can you add certain content to Stremio? Sorry, we don't provide any content ourselves, but the more Stremio add-ons you have installed, the more content you'll be able to find. Can Stremio play magnet links? Yes, and can also play regular HTTP links and torrent files (drag and drop).
