Live wallpapers came about with the introduction of iPhone 6s and 6s Plus (2015). The whole idea behind creating live wallpapers for iPhone was to use 3D Touch technology to bring images to life with a touch and hold gesture. With the iPhone XR, Apple introduced Haptic Touch, which is a long press gesture instead of 3D Touch. The tech giant was said to want to remove the 3D Touch technology to make more room for a bigger display and fit a bigger battery. Live wallpapers require a model with 3D Touch or a device that supports touch/long press. Supported iPhone models with 3D Touch: iPhone 6s, 6s Plus, iPhone 7, 7 Plus, iPhone 8, 8 Plus, iPhone X, iPhone Xs and Xs Max. Supported touch/long iPhone models: iPhone 11, 11 Pro, 11 Pro Max, iPhone 12, 12 mini, 12 Pro, 12 Pro Max, iPhone 13, iPhone 13 mini, iPhone 13 Pro and iPhone 13 Pro Max Unfortunately iPhone XR and iPhone SE (1st and 2nd generation) does not support live wallpapers.
