### Grammar Lesson for: Verb Tenses: Present, Past, and Future

#### Unit Theme: Conventions of Grammar

**Essential Question:** How can using proper verb tenses: present, past and future help students create written works that are clear and exhibit correct use of the conventions of written Standard American English?

**Definition:** Verbs show action or state of being and they can show when something happens. The "when" part of the verb is called **tense**. We use three tenses in writing. The present tense describes something that is happening now. (I walk to school.) that takes place in the present, so I use a present tense verb. In the next sentence, I am talking about something that happened in the past. I walked on his same street when I was little. For many verbs add -ed to show what happened in the past. When something will happen in the future, leave the word the same as it is and add the word will or shall in front of the verb. (I will walk to school.)

**Prerequisite Knowledge:** Before students can understand **Verb Tenses**, they must first understand verbs, the three tenses and their purpose in reading and writing.
