Sonar jacocosensor jacoco report not found

Sonar jacoco no coverage. Sonarqube jacoco report not found.

There is a big difference between `sonar.junit.reportpath` and `sonar.jacoco.reportpath`. You are confusing the values. Similarly, there is `sonar.jacoco.itreportpath` (for `jacoco.exec` files based on non-unit tests for example: `jacocoit.exec` (if you are creating for integration tests)). Now, depending on the version of the Sonarqube instance (4.x or the last 5.x), you may need to set `sonar.junit.reportpath` or `sonar.java.junit.reportpath` to value `e` (which is the folder containing the `.xml` data). For example : If the result files of the Unit Test or Integration Test folder (.xmls) are in the Build / Test-Results / UT folder, then: `sonar.java.junit.reportpath = Build / test-results / ut` or `sonar.junit.reportpath = build / test-results / ut` for the code coverage file (ex. you have to use: `sonar.jacoco.reportpath = build / jacoco / ut / jacocoit.exec` or `sonar.jacoco.itreportpath = build / jacoco / it / jacocoit.exec` important à € *Sonar property: `sonar.jaco.xxx` points to file name. `Sonar.junit.xxx` or `sonar.java.junit.xxx` points to the name of a folder. `Sonar.surefire.xxx` or `sonar.java.surefire.xxx` points a The name of a folder. Similar to `sonar.junit.reportpath`, there is also another property called: `sonar.surefire.reportpath` or `sonar.java.surefire.reportpath`. Look for sonar documents for more information to analyze the source code with Maven / Gradle. Source+Code (expanding it). For example: analyzes with the gradle compilation system, look for the Configure Analysis Properties / Other section. 1294 Visibility 0 arrow circle up 0 arrow circle down When I tried to analyze a Java program using Maven for Sonarqube 5.6 analysis I can't see the result of the dashboard analysis. I added all the plugins and the compilation steps in my pom.xml and I executed MVN Clean Deploy. However my compilation shows success but the analysis is not posting on the sonarqube server and in the task in the background show failed SonarQube web server UI) My pom. xml: 4.0.0 com.test.analysis hello.sonar 1.0-SNAPSHOT jar hello.sonar UTF-8 0.7. 9 2.19. 1 junit junit 3.8. 1 test.org. Apache. Stomach. plugins maven-surefire-plugin \${surefire.version} target/jacoco. exec test À € à, ~
