As always, the event brought together legends, rising stars, and the game's best to compete, connect, and celebrate women's disc golf. ... More June 26, 2025 Riley O'Neill 87 0 Do I have to use the app? The app is optional. You may use the handheld by itself. Do you charge for updates? Updates are free. And there are no subscriptions. How much is the app? The app is free and there are no hidden fees or subscriptions. In-app purchases are optional. Does this work outside of the USA? Innova scanners are made for vehicles sold in the US and Canada. The app will also only work for current US or Canada residents. Does this work on 2023 or 2024 vehicles? The scanner currently supports vehicles from 1996 through 2022, with updates for 2023 models in progress. Once the update is available it will be provided for free. Do you support FCA vehicles? The tool is incompatible with vehicles needing FCA (Fiat Chrysler Automobiles) gateway access for advanced diagnostics, such as 2018+ Jeep, Fiat, Chrysler, Dodge, RAM, Alfa Romeo. It will work on FCA vehicles up to 2017. Can this reprogram vehicle computers? No. It also does not support key fob programming. Will this work on vehicles that cannot start or crank? No. OBD2 scanners need a vehicle that can start or crank, as they operate by communicating with the vehicle's Electronic Control Units (ECUs). If the vehicle can't start, the scanner won't be able to establish communication with the ECU and the scanner will not work. So your vehicle must be able to start or crank to use any obd2 scanner.
