Author Message New Member 11-13-2016 , 09:23   Dedicated CSS Server wont change map #1 Hi guys as the title states I can't change map on my dedicated server. This is the server log when I try to change map to "trikz_advanced". As you can see I type !map trikz_advanced and then at the end it changes back to de_dust2 on the last line. Also on my screen ingame it just gets stuck on "Server is changing level" and when I press cancel and go to browser it shows my server still on de_dust2. New Member 11-13-2016 , 11:40   Re: Dedicated CSS Server wont change map #3 Ok I did a full reset of the server. Haven't installed Metamod or Sourcemod yet. I am able to change level to any of the default maps (de_train, de_dust, etc) with no problems using rcon changelevel de_train. Then I went into FTP and added trikz_advanced to the /cstrike/maps folder. Heres the server output when I tried rcon changelevel trikz_advanced. Thank you from GameBanana Counter-Strike: SourceThreadsServer AdministrationMaps won't Download Why? So I do the same thing for every map I add to my server. I had my server reinstalled so i had to do everything over again. Here's what I do: Add the Map to my Maps folder through ftp Add any other file to it's required folder Modify my Maplist.txt to include the map I added Modify my Mapcycle.txt to include the map I added Modify my Votemaplist.txt to include the map I added Change the map so they all show up through my Mani admin list in game. The problem is that some of the maps won't download for the people that join my server :(Did I miss something? Ummm, Dose the message say ".bps file missing server disconnecting"? Server Technician Posted by Ringwraith.Shana Ummm. Dose the message say ".bps file missing server disconnecting"? I don't know. I think it says Missing Map. But It doesn't happen to me. It happens to people following me to the new maps to try them out. I am sure the .bsp file is in there though. It happens on the Wall of China map. This happened to me too. I dont know a way to fix it they just have to dl the npa from somewhere else. Server Technician Put these in your server cfg: sv_allowdownload 1 net_maxfilesize 90 I hope it all turns out nicely =) If you have fast download, then make sure that the .bz2 file is in the map folder on the fast download. You brought up a good point. I want Fast Download. Know how? Does it cost? Posted by iCaveman You brought up a good point. I want Fast Download. Know how?
