ⓘ About

On this guide We'll show you how to bypass Xiaomi Redmi 9 lock screen password, PIN, or pattern lock in case you forgot any of them, after factory reset or having display issues. We have lots of methods to unlock Xiaomi Redmi 9 free, including hard reset or factory reset. We all know how important is to lock our Xiaomi devices by setting up a password, pattern lock, pin or fingerprint in order to protect our data and privacy. But forgetting the password we've set up before it's a basic human instinct. Fortunately, there are some ways to reset Xiaomi when forgot password and we'll share with you in this guide. Before going through our guide, let me tell you that is very important to backup your data regularly. In case of a Xiaomi Redmi 9 factory reset, which we'll show you later in this guide, you may lose all of your data. However, if you did a backup you can restore all the settings and documents (photos, contacts, etc) you've made on your device. With that being said, let's proceed through few methods to bypass Xiaomi Redmi 9 password devices with or without factory reset. Method 1: Unlock Xiaomi Redmi 9 Lock Screen Through Mi Account This unlocking method suppose to have remote unlock feature enabled on your device, but also your Xiaomi account linked with the device. Go to your MI account accessing this page and follow these steps: select the device you want to unlock (in our case Xiaomi Redmi 9), click/tap on unlock from the menu and to confirm screen unlocking you're been asking to put your password, set a new password to unlock Xiaomi Redmi 9 in the future. Method 2: Remove Lock Screen on Xiaomi Redmi 9 via Android Device Manager If you linked your Google account with your Xiaomi device, this means you can find the device on your Find My Device page, but make sure you have this option turned on. Beside erase and secure device, there you can find a LOCK option. This feature is all we need to set a new lock screen such as a password. Clicking on the LOCK feature from left sidebar, a window will show up. There you need to set a new password which will be used to bypass Xiaomi Redmi 9 password in the future. You can also set up secure and erase the device from the menu. Method 3: Unlock Xiaomi Redmi 9 Password Lock with ADB This method require to have some technical knowledge or to be familiar with the ADB tools (Android Debug Bridge) and command line, but also your locked phone needs to have USB debugging enabled. Once you have downloaded ADB (check this article on how to download and install ADB) on your computer, let's proceed through a few steps: use a USB cable to connect your device to computer or laptop, open the command prompt by pressing Win + R and then enter CMD once here, type this command and you're Xiaomi device will disable the lock screen: adb shell rm /data/system/gesture.key You're almost done. Now just restart your phone and you will see that the screen lock has been disabled. Now you can set a new password for your own privacy. Method 4: Bypass Password on Xiaomi Redmi 9 via Safe Mode If you have installed an 3rd party app to set up a lock screen for your Xiaomi device, then this option should work for you. If you don't already know, the Safe Mode option will disable all apps that you have installed on your phone. To boot into Safe Mode, press the power button then long press power off option. Then you will be asked if you want to reboot the device into Safe Mode. Select OK and restart the phone. Once turned on, look for the app which you had used to set the lock screen and uninstall or wipe the data. Now you can set a new lock screen for your smartphone. Method 5: Disable Xiaomi Redmi 9 Screen Lock with Emergency Call Hack Believe it or not, there are some users saying they can bypass Xiaomi Redmi 9 lock screen without password with emergency calls. Even some said this solution works only on Android 5 and below, others said this might work on recent versions too. As you may know, even if your screen is password locked, you can do some commands, such finding the device's IMEI and more. So if you're asking how to factory reset Xiaomi Redmi 9 when forgot password using emergency call, the answer is YES! Let's proceed through the steps: tap on the Emergency Call option on your device's lock screen. Once the dialer shows up, enter like 10 asterisks (*) then double tap to highlight the characters and copy it. Now paste, and copy it and paste it again until the field is full and can no longer be highlighted. Now go back to your lock screen and launch the Camera app. Access the drop-down notifications menu and then go to the Settings. Once here, you're being asked to input a password. Paste here the string you have copied in the first step until the interface would be crashed. Now the Camera app will be opened and your Xiaomi will be unlocked. To be honest, I haven't tried this method yet, so I am asking you if this worked for you. When I forgot my lock screen password I have used Dr. Fone lock screen removal tool. I highly recommend this software in case the methods described here won't work for you - even I doubt it. Extra Method: Bypass Xiaomi Redmi 9 Lock by Factory Reset (Hard Reset) Our last solution to unlock android phone without password is through factory. This method will erase all data from your device so it's very important to have a backup before going with this, but it will also remove the lock screen pin or password as well. Follow these steps to bypass screen lock by restoring Xiaomi Redmi 9 to factory reset: Step 1: when your device is turned off, press power and volume down at the same time. Step 2: release the buttons when the Xiaomi logo is displayed, then immediately press and hold the power again. Step 3: when Android System Recovery screen is showing up, you can release all the buttons. Step 4: using volume buttons go through menu and select wipe data / factory reset by pressing the power button. Step 5: now select reboot system now to restart the phone. Once restarted the screen lock will be disabled. Last Words We hope you have found what you've been looking for and you've successfully unlocked Xiaomi Redmi 9 without password on your device. If you have any comments or feedback, please do not hesitate to contact us. We appreciate if you share this guide with your friends/family. Something went wrong. Wait a moment and try again. Remove Pattern Lock / Bypass Password: Xiaomi Mi and Redmi users now can easily reset a forgotten Password/PIN/Pattern to unlock their respective smartphones with the help of the following procedure. There are many reasons behind your Mi phone being locked due to unnecessary attempts. Sometimes when you put the mobile into your pocket gets locked if you forget to turn the screen display off or even kid's locks sometimes while playing with it. But now you can easily get rid of these situation by just resetting the password/PIN/Pattern on your Xiaomi phone. Also how to change fonts style in MIUI phones. Note: The following guide works only if your Mi mobile is signed in to your Google or Xiaomi account and connected to Internet. Guide to Remove Forgotten Password/ PIN/ Pattern Lock on Redmi and Mi phones Method 1:1. After typing wrong password continuously for 5 times, you will see a screen with message "Phone has been locked" with "Forgot Password" option at the bottom. 2. Now you need to tap on Forgot password. 3. If you have entered Google or Xiaomi accounts on your device, you can choose any one for resetting the device password. 4. Once selected, enter the valid password for that account and tap on Sign in. 5. That's it! Now you can set a new Password/PIN/Pattern for your Redmi and Mi mobile. Method 2: The above is the only method to reset the forgotten password on your Xiaomi phones without any data loss. The another method to get access to your device in case of phone locked due to number of wrong attempts is not through hard reset device. But doing so, all your mobile data will be deleted (media, contacts, apps, accounts). So, it is recommended to perform backup of all your necessary data. To perform hard reset, power off your phone and boot into recovery mode (Power + Volume up key together). From recovery, choose Wipe Data / Factory Reset and confirm the action using Power button. Once done, reboot the device into system mode. Now your device will be restored to factory settings. Congratulations! You've successfully removed Pattern / PIN / Password lock from your Xiaomi phone. Don't forget to share with your friends via Facebook and Twitter and let them know the solution when their Mi phone gets locked. The lock screen feature is provided to ensure that the user's data and information are safe from being stolen whether the phone is stolen or lost. However, sometimes user may forget pattern lock on Mi. In such a situation you won't be able to access the device. This is one of the examples out of thousands that we see every day on the internet that people are asking about how to bypass the screen lock in Mi phones. In this article, we will help you on how to unlock Mi phone pattern lock without losing data. How to Unlock Pattern Lock in Mi without Losing Data In this part, we will make use of the Mi account to unlock Mi pattern lock. You will get an alert if entered password or pattern was wrong. You have to wait 30 seconds and try again. After 5 wrong attempts, "Forgot password" will appear on your screen and you need to tap on it. Enter your Mi account's username and password to unlock your Mi phone. Even if you have forgotten your Mi's account details, you can keep going on with the steps given below. You have to install your SIM card from your phone to another, so you can receive text messages or calls. Now enter Xiaomi Cloud in your web browser and click on "Sign in with Mi Account". Now find and click on "Forgot password" and the reset password form will appear. You can recover your account by entering your "Mi Account ID" and you can easily recover your Mi account. This will help you to unlock the Mi phone pattern. How to Unlock Mi Phone Pattern Lock If Forgotten The above method is really helpful in most of the scenarios, but it requires Mi account had been logged in your Xiaomi phone already. Otherwise you are unable to enjoy the benefit. Is there any other way to unlock Mi phone pattern lock if forgotten? Well, we have a solution to this problem that's by using third-party tools. iToolab UnlockGo (Android) allows users to remove Mi pattern lock and any other screen locks within minutes, it is compatible with all the android versions. iToolab UnlockGo for Android is capable of lock screens removal without getting into many complicated steps. You can download and install iToolab UnlockGo (Android) easily above, follow the step-by-step guide provided below. Step 1. Connect your Mi Phone After successful installation of UnlockGo (Android) on your computer, launch it and click on "Unlock Screen Lock". Click on the "Start" button and connect your Mi phone with your computer using the USB cable. Step 2. Select Device Brand Choose your phone brand (which is Mi in this case) from the and click "Unlock" to start the proceed the unlocking process further. Step 3. Let Your Device into Recovery Mode In this step, you have to put your Mi phone into recovery mode. For this, you can follow the screen introduction to get your device into recovery mode. Step 4. Start Unlocking Mi Pattern Lock Once your Mi phone has entered the recovery mode, you will have to follow the instructions provided to you on the screen. Step 5. Finishing the Unlocking Process Once, the unlocking process is completed you have to restart your device and now you can set a new screen password. How to Unlock Mi Phone Pattern by ADB ADB stands for Android Debug Bridge a command-line tool that lets the user easily communicate with an android device. ADB allows users to access some features of the device without rooting it such as recording the screen without installing any third-party app and manually updating the android OS version of your device. We can unlock Mi phone pattern lock without losing data using this ADB. First of all, you need to install the ADB tool on your computer. As the Mi phone is locked so you have to get that into recovery mode. Then you will make the connection and will access the Mi device. By pressing the Shift key + Right-click access the ADB tool and choose Open PowerShell window here. Here connect your Mi phone with PC and make sure the relevant drivers are installed already, if not please install them first. Now open the Command Prompt on your computer. Then type "adb devices" and press Enter. The information of your Android device will appear and if it's not appearing then you have to be sure you have followed all the steps correctly. Press and hold the Power + Home + Volume Up/Down buttons to go into ClockworkMod recovery and use the command "adb pull / data / media / clockworkmod / backup ~/ Desktop / Android-up" to back up the data to your PC. Now you can enter the commands given below to unlock the Mi phone pattern lock. adb shell rm /data/system/gesture.key Note: This method requires having an expert level knowledge of computer and command prompt. So, it's recommended to use the easier and more reliable method than using UnlockGo Android if you regularly take backups of your phone. People Also Ask about Mi Pattern Lock How to change pattern lock in Mi? Find the Settings app on your phone and tap on Password & security. Select on Password > Change screen lock > Pattern. Enter your original password/pattern to verify authority Set a new pattern lock and draw it again to confirm it. How to remove pattern lock in Mi? Open the Settings app on your Mi phone. Tap on Password & security > Password and tap on Turn off the lock. Now you have to enter the correct Pattern to remove the pattern lock from your phone. Conclusion Pattern lock is a way to enhance the user's protection from stealing sensitive information and data. But sometimes user may forget their pattern lock and it's not an easy task to unlock Mi phone pattern lock without losing data. In such a situation, you can use iToolab UnlockGo (Android) for removing screen locks.
